

ERSEY THIRSTDAYS HASH HOUSE HARRIERS

Run 116a, 21 Mar 2009, Mijas, Spain. Hare: Salmonella Rushdie (Malaga H3):
The MTH3 Pack: AE, 10", AP, Sprog, Cleo, Overdrive and FCUK

MTH3's first hash holiday to Spain!

10" gets a bit of last minute training in at the airport

Peel Holdings set the bar quite low for passenger behaviour in the airport... not for us surely?

We made it to Spain and were offered tantalising vistas before we had even left the airport...

We found AP who had come in from another European country....

We rode the rails (train and tram) to the villa

Wondered what sort of supermarket this was... Polish, Russian, heroic, erotic?

The villa was great with a pool and lemon trees and hidden standing water (more on that later)

Soon it was onto the RV point

10" was anxious to get started to demonstrate his pre-flight fitness

Malaga HHH3 demonstrated their hospitality. What an incentive to finish the run...

Has Sprog emptied a supermarket trolley of booze already. Cidre, cidre, my friend....

It was on off as we looked forward to some great moments

Up up and away, not long we climbed through a building site

Then through a hill top village in the Mijas country

More climbing....

Local kids help us out (he went thataway....)

Genuinely beautiful village-scapes

And views down to the coast from the 'sierra'

Finally a beer stop in the centre of the village, where Overdrive led a celebratory Vindobona H3-style dance

Down down a bit to the circle

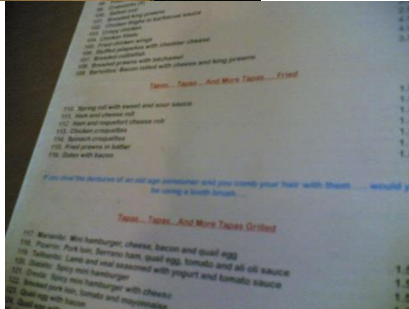

Sprog meets cidre, it was love at first sight...

Thanks to SR the Malaga H3, hare

The initiation ritual involved fish. This was a dark, dark place...

Sprog, Spanish cidre is known to cause excessive tongue growth...

A hilarious evening ensued. This was a great hospitality from a Hash that also had Spanish members and knew some really good places in town.
